

Rio Munho ~~2011~~

Steel Steam Trawler "LUCIDA" (Yard No. 175), building by
Messrs. The Goole Shipbuilding & Repairing Company, Ltd.

Equipment number 4481 (New Rules).

The anchors required by Table 30 of the Rules for this
Steam Trawler are of the following weights:-

	Cwt.	qrs.	Lbs.	
1st. Anchor	7	0	0	Stockless
2nd. "	5	0	0	ex. stock.
3rd. "	2	3	0	"
Total weight	<u>14</u>	<u>3</u>	<u>0</u>	

The Hull Surveyors now forward the certificates of the
anchors supplied, from which it will be seen that the anchors are
of the following weights:-

	Cwt.	qrs.	Lbs.	
1st. Anchor	7	1	16	Stockless
2nd. "	4	3	14	ex. stock
3rd. "	2	2	18	"
Total weight	<u>14</u>	<u>3</u>	<u>20</u>	

It will be seen that the weight of the 1st. Anchor is
1qr. 16Lbs. in excess of the rule requirements, and the collective
weight of the three anchors is 20Lbs. in excess of the weight
required, but the weights of the 2nd. and 3rd. anchors are 14Lbs.
and 10Lbs. respectively less than required by the Rules.

It is submitted for the consideration of the Committee
whether, in view of the collective weight of the three anchors
being in excess of that required, the anchors might be approved
for the figure 1.
