Enclosure.

7th September, 1906.

Dear Mr. Williamson,

With reference to the case of the steamer "ST. GEORGE", I thought it well today to send you a wire asking whether the minute should not include "with freeboard", and I am much obliged to you for your telegram in reply.

The certificates are being forwarded tonight, and I enclose the first entry reports for the necessary addition to be made to the minute. Perhaps you will kindly let me know when returning the report if the double bottom under the engines is constructed on the cellular system.

With kind regards,

Yours very truly,
