-:-----:-

The Second Special Survey No. 1 became due in January, 1919.

In May, 1919, the Society's Surveyors at Buenos Aires recommended that the front end plate of the main boiler should be further examined within three months.

The vessel came under survey at Buenos Aires for boiler repairs and for the Special Survey No. 1 in September, 1919. The same Surveyors now state, however, that the vessel has become the property of the Compania Argentina de Navegacion, Ltda. Owing to the strike which lasted over a year at this Company's works, the repairs in hand have been entirely suspended, and the Surveyors have been informed that it is not proposed to continue the vessel's class in the Register Book.

In the circumstances, the Classing Committee, who had the case before them on Wednesday, the 3rd instant, decided to expunge the class with a red line (8.21), indicating non-compliance with the Society's Rules.
