

S. Marie Repple.

It was built at Rostock in 1919 under  
the Lloyd Survey, the plans having  
been approved by this Society before the war.

Machinery & boilers have been opened up  
and the scantlings found in accordance  
with the approved plans.

All Surveyors state that the Survey has  
been completed with the exception of the  
adjustment of the Safety valves & the  
trials of machinery under steam.

Owner's Representative states that the  
work will be completed before the vessel  
leaves.

It is submitted that  
this vessel is eligible for

Blue Record. L MC. 10. 20. FD.

Subject to the Safety valves being adjusted  
the machinery tried under steam  
in the presence of a Surveyor to  
this Society.
