

WOOD AUXILIARY SAILING VESSEL -  
"NUESTRA SRA. DE ARANTZAZU" built by the  
Astilleros Pasajes. (their No.9 Vessel)

-----

It is submitted the Bilbao Surveyors should be requested to reply by return to the Secretary's letter of the 5th June re the Motors fitted in this vessel, and as requested therein to forward a report on Form 4 of the particulars of the Motors and also a plan of the Oil Fuel tanks and sterntube, and also to the Secretary's letter of the 6th June regarding the 60 H.P. Wolverine Motor fitted on board the wood vessel No. 10 being also built by Messrs. Astilleros Pasajes.

They should explain the serious delay which has occurred in not forwarding the information asked for, as even if they had not Form 4 as stated in their letter of the 28th June, this was no reason for not forwarding the plans asked for and also the particulars of the Motors etc.
