

1st October, 1918.

THIS IS TO CERTIFY that the Engines No. 563  
constructed by The Fairfield S.B. & E. Co., Ltd., and the  
Boiler No. 3647 constructed by Messrs. James Neilson & Son,  
Glasgow, have been surveyed by the Surveyors to this Society  
during construction and fitting on board the Steam Trawler  
"JOHN FISSER" and have been satisfactorily tried under steam.

These Engines and Boiler have been built in  
accordance with the Society's Rules and would have been entitled  
to the record of L.M.C. 9,18 had they been fitted in a vessel  
intended to be classed with this Society.
