Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

4th March, 1946.

S

Dear Sirs,

tug "EMPIRE FRIEDA"

With reference to your report No.23237 on this vessel, I would remark it is concluded the pumping arrangements have been fitted in accordance with the approved plans.

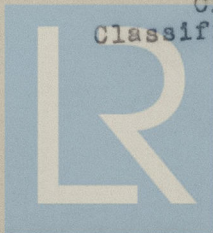

I shall, however, be obliged if you will confirm that the main circulating pump direct bilge suction is 5½" and not 5" and that the suctions connected to both main bilge pumps and auxiliary bilge pumps is one 2", and not six as reported.

In future similar cases when plans are not forwarded, it will be appreciated if you will state in your reports the dates of approval.

Yours faithfully,

Clerk to the
Classification Committee

The Surveyors,
GREENOCK.
