

Less Christoph Ruthofs Nos 520 - 524.

Submitted the Trieste Surveyors he  
means that if the anchor marked "d" is  
his Patent Stockless Anchor, as appears to  
be the case from the sketch, it would be  
ones for use in a classed vessel as this  
of Taylors anchor was approved by the  
Committee on the 31<sup>st</sup> Jan '95.

If however the sketch marked "d" is not  
designed to represent the above anchor, then  
the matter can require consideration  
it will be necessary to forward a sketch of  
a stock anchor on a scale of  $\frac{1}{2}$ " to the foot  
a model of the anchor.

The four fluted anchor is not such as could be  
intended for the Committee's approval for use in a classed
