

Port Kobe

31st March 1875

This is to Certify that

A. L. Jones

the undersigned Surveyor to this Society did at the request of

Messrs The Kobe Steel Works

attend their Works at Dairenchama for the purpose of

inspecting during the process of forging, machining & finishing
& testing five lengths of intermediate shafting, one
thrust shaft & two propeller shafts

to the order of Messrs The Kobe Steel Works

and intended for the steamer Yard No. 853 being built at their Yard.

These eight shafts were found, as far as could be
ascertained, sound and free from defects and were stamped as under.

Mark on each shaft :-
