The Annual Survey of this vessel's boiler became due at the end of last month, but the Stockholm Surveyor now states he is informed by the Owners that as the vessel has come under the Swedish Regulations, which apply principally to passenger vessels, they do not see the necessity of maintaining the classification of the tug in the Society's Register Book.

In the circumstances the Classing Committee, who had the case before them on Tuesday, 8th instant, decided to give instructions for the vessel's character to be withdrawn from the Register Book and three dots (...) inserted in lieu thereof, indicating withdrawal of class at Owners' request.
