"P"

Dear Sir,

With further reference to my letter of the 5th January, 1948 and to previous correspondence regarding the assignment of freeboards to the steamer "PLADDA", I have to advise you that the vessel came under survey at this port on the 2nd February last.

In view of the unsatisfactory nature of the survey and the probability that the Owner will again communicate with the Committee through his London Representatives, I think it advisable to send my report to you by airmail.

I hope that the Committee will agree with my view that the survey should be deferred until suitable arrangements are made to carry out the Committee's recommendations in an efficient and workmanlike manner.

Yours faithfully,

John Wormald.

The Secretary,
LONDON.
