In reply to your favour of todays date I beg to advise you that according to Italian Law the steamer must be classificated to the Registro Italiano. In the circumstance being necessary to have a Certificate of seaworthiness only from Cadiz to an Italian port this matter is in the hands of the Italian Consul who has already named a Survey for the purpose.

When the steamer will be in the port for the permanent repairs and for the Classification, the Owners from Brindisi, will decide about the fact whether to keep the steamer in both Registers.

Yours faithfully,
