

of ROTTERDAM.

12th January, 1927.

CHARLES H. BOURCE,

the Master of the Italian steel screw steamer "SALENTO", 3859  
tons gross, attend on board whilst lying at this Port in order  
to state my opinion as to the fitness of the vessel to proceed  
on her voyage, it being reported that she has touched with her  
propeller a lighter whilst leaving Antwerp on the 10th January,  
1927.

Found upon examination of propeller tips of two blades slightly  
bent, but further in good condition.

The vessel is in my opinion in a fit condition to proceed on  
her voyage, but it has been recommended that the propeller and  
fastenings should be specially examined next drydocking.

A copy of this report has been duly forwarded to Lloyd's Register  
Office, London.
