

"ROBINA"

It is submitted the plans of profile and midship section be sent together with an extract of freeboard particulars to the Liverpool Office, wh~~o~~ should be advised that Convention Freeboards have not been assigned previously to this vessel.

In forwarding their Rpts Cl1 and Cl1(Comp) for freeboard assignment they should state the height of the sill of the lowest sidescuttle above the top of the vessel's keel.

It is noted the Owners desire a draught of 7' 0", and from the information at present available, it would appear that this will be obtainable.
