The survey of this vessel's screwshaft became due at the end of May last.

The Kobe Surveyors now state that they have received no reply from the Owner to their repeated inquiries regarding the survey. They add that the vessel has now been classed in the local Japanese Society and the British Corporation, and as the Owner apparently does not intend to comply with the Society's requirements in regard to the survey in question, they recommend that the vessel's class should be expunged from the Register Book.

The case received the consideration of the Classing Committee on Tuesday, the 1st instant, when it was decided to give instructions for the vessel's class to be expunged from the Register Book with a red line (12.25), indicating non-compliance with the Society's Rules, and the Owner has been informed accordingly.
