

S.S. "SEATTLE" - No. 25908 in the Register Book.

-----

This vessel was built by Messrs. Wood, Skinner & Company in 1911, and was classed with the Norske Veritas.

A letter has been received from Messrs. Eggar, Forrester & Parker, Limited, representing the Government of the Union of South Africa, who have taken over the vessel from the Ministry of Shipping, stating that it is desired that the vessel should now be classed with this Society.

It is submitted the Writers be informed that the plans submitted by them have been examined with a view to classification, but that a few items shewn thereon are not quite clear.

They should therefore be requested kindly to ascertain from the Builders, the construction of the open floors in the double bottom, and to submit a sketch shewing the same, together with a sketch shewing the strengthening in way of the widely spaced quarter pillars. The spacing of the angle gussets at the tank margin should also be stated.

On receipt of this information, the Writers will be immediately informed as to the Society's requirements for classification.
