H. Dept

23rd September, 1919.

Dear Sirs,

With reference to your letter of the 13th instant respecting the S.S. "SEATTLE", I have pleasure in stating that the plans forwarded by you have been carefully examined with a view to the classification of the vessel.

As, however, a few items shewn on the plans are not quite clear, I shall be much obliged if you will kindly ascertain from the Builders the construction of the open floors in the double bottom, and forward a sketch shewing the same, together with a sketch shewing the strengthening in way of the widely spaced quarter pillars. The spacing of the angle gussets at the tank margin should also be stated.

Immediately upon receipt of this information, I shall have much pleasure in communicating to you the Society's requirements for classification.

I am, Dear Sirs,

Yours faithfully,

Messrs. Eggar, Forrester & Parker, Ltd.,
2, 3 & 4, Billiter Avenue,
E.C.3.
