Lloyd's Register of Shipping,
Battery Place,
New York, USA.

LLOYD'S REGISTER,
LONDON.

REC'D - 1 APR 1923

Sirs:

ANSW

Aux. Schoer. "SAN RAMON"

It is but with deep regret that we beg to refer to your letters of September 14th, December 18th, February 2nd and March 1st, relating to sizes and test markings stamped upon the shafts and propellers of said Aux. Schooner, as we have been unable even to this date to obtain a complete and reliable information in the case as you desire, for any cause or the other.

According to a report on this Ship's Machinery rendered to the Register's London Office by our Surveyor, on the basis of the latter's information, it appears that the dimensions of shafts are as follows: Tubnel shaft as fitted: 6-5/8"; Thurst shaft as fitted: 6-5/8".

As to the stamping of the crank shafts, we may inform you that we have seen a Report rendered under date of March 7th, 1918 by Mr. W. Lawson, Surveyor to Lloyd's Register at San Francisco, stating that they are marked thus:

No. 136 Shaft	<u>Lloyd's.</u> No. 545. 31-7-17. <u>W.S.</u>	No. 136 Shaft	<u>Lloyd's.</u> No. 215. <u>R.B.5-17.</u>
---------------	--	---------------	---

We have been informed by the Owners that this vessel is to be in this Port next week and we will recommend our Surveyor to verify the above marks in order that we may inform you afterwards of the result.

Apologizing for our delay in answering to your mentioned letters we beg to remain, Dear Sirs,

Yours faithfully,

Lloyd's Agents.
