

LONDON

SF Rpt No. 2898

SAN FRANCISCO,

Sept. 10th, 1918.

A. V. LAWSON,

the Skandia Pacific Oil Engine Company, Oakland, California,  
survey during construction one 120 BHP 2 cylinder, 2 stroke  
cycle, single acting oil engine. Shop Number 224. This engine  
was constructed in accordance with the prescribed tests, and  
the workmanship was found to be good throughout. The air  
receiver was tested to 500 pounds water pressure and found  
sound. On completion the engine was examined under working  
conditions on the test stand and found to be satisfactory.

For identification purposes the cylinders, covers,  
and bed plate are marked: "LLOYD'S No. 224."

The Shafts are marked:

Crank Shaft LLOYD'S  
No. 604  
ATL 5-12-18

Thrust Shaft LLOYD'S  
No. 24  
ATL 20-11-17

(Signed) A. V. Lawson,  
Surveyor to Lloyd's Register.

Fee applied for Sept. 10, 1918.

\$ 55.00
