

Steel Screw Steamer "BOUSSOLE" ex "ST. ELOI".

Alterations to this vessel are now being carried out at Bordeaux.

The alterations include the closing up of part of the forward and after wells by linking up the winch platform erections to the existing bridge, and the reduction of the widths of Nos. 2 and 4 hatchways on the upper deck.

A plan showing the proposed alterations, together with a sketch showing various details of the construction were dealt with in this Office on the 11th ultimo. These plans were forwarded to the Surveyors for their information and guidance.

Further copies of these plans have now been received from the Bordeaux Surveyors, who request that two copies of each plan be approved for the information of the Compagnie des Messageries Maritimes.

The copies have been compared with the approved plans and found or made equivalent thereto, and it is submitted three copies of each plan be forwarded to the Surveyors, as desired.
