

17th February, 1948.

Dear Sir,

S/S "LYNGAAS"

M.

I duly received your letter of the 30th ultimo regarding a proposal to enlarge No. 1 hatchway in the above ship by shifting the forward end coaming to Frame No. 17, and have to state that the scantlings previously approved for No. 1 hatch will not be affected by this increased length. The hatch end beam previously approved should therefore be moved one frame space forward and the same webs equally spaced over the new length.

Yours faithfully,

S.A. Eide, Esq., B.Sc.,
BERGEN.
