

Steamer "VENICE MARU".

The Classing Committee to-day decided to report this case for the information of the General Committee, as regards the electric welding of the single riveted seams of inner bottom plating in the No.4 tank.

Captain Hooper, who was in the Chair, desires that the Chief Ship Surveyor will arrange for a statement to be prepared for the General Committee, furnishing particulars of similar cases, also indicating what steps, if any, have been taken by subsequent examinations to ensure the continued efficiency of the work.
