

S.E.A.C. Type Coasters "MAYTHORNE" and "MAYSPRING".  
-----

These cases are fully stated in endorsement dated  
18.3.47.

In reply to enquiry Mr. Bennett cables that he has discussed these cases with Mr. Dobson and they agree that, as in the case of the "OTTAWA MAYCLOUD", the service North of 36° North should be limited to between the 1st April and the 31st October, i.e. the Summer period.

The service limits of the "MAYTHORNE and "MAYSPRING" will therefore be "East Coast of Canada and United States to Anticosti Island (service North of 36° North only between 1st of April and the 31st of October); in the Gulf of Mexico and to West Indies, and North coast of South America to Georgetown".

(Sd) E.P.

3rd April 1947.
