

"OTTAWA MAYTHORN"

Mtl. 7019

Hfx. 5481

"C" Type Coaster (Oil Engines).

The Montreal Surveyors have forwarded a report on the completion of the machinery for the above vessel. The main engine was constructed under the supervision of the American Bureau of Shipping and a certificate has been forwarded.

The torsional vibration characteristics for the sister vessel "OTTAWA MAYSPRING" have been under consideration in this Office, and a reply is awaited to the Secretary's letter "E" of 25. 10. 46 to the New York Surveyors requesting torsigraph records for further consideration.

IT IS SUBMITTED action be deferred in the present case pending torsigraph records being taken in the sister vessel.
