# Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

5th May, 1932.

Dear Sir,

I have to acknowledge the receipt of your letter of the 2nd instant from Stockholm enclosing a Report C.11 relating to a survey held at that port on the steamer "FREDRIKA", and with regard thereto, I have to inform you that when this ship was measured for freeboard assignment in 1919 the following sheers were reported, viz:-

Stem	91"	
Sternpost	30 $\frac{1}{2}$ "	
$\frac{1}{8}$ length from stem		51"
$\frac{1}{8}$ length from sternpost		17 $\frac{1}{2}$ "

As the sheers now reported appear to have been measured while the ship was trimming by the stern, I shall be glad if the Society's Surveyors at Stockholm will forward amended sheer figures with a view to reconciling them with the above sheers.

I am, Dear Sirs,

Yours faithfully,

V. C. Bulow, Esq., K.V.O., R.D.,  
GOTHENBURG.
