

BOARD REPORT on the

S.S. "FREDRIKA"

It is submitted the Stockholm surveyors be informed that when the above vessel was measured for fullboard assignment in 1919, the following sheers were reported

Stem 91"
Stempost 30½"

51"
17½"

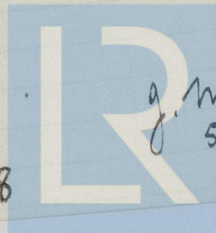

1/8 Length from stem

1/8 Length from stempost

As the sheers now reported appear to have been measured while the vessel was trimming by the stern, the Surveyors should readjust their figures with a view to reconciling them with the above sheers.
