

Lloyd's Register of Shipping.

HEAD OFFICE: 71, FENCHURCH STREET, LONDON, E.C. 3.

Port of Piraeus,

Odos Notara, 50^a, 6th December, 1939.

to be addressed to
REVEYORS.

Dear Sir,

s.s. "TANAIS".

We are in receipt of your letter of the 3rd ultimo respecting the above named vessel's Electrical Installation.

We beg to reply to your various points raised, to the best of our information now at hand, it being understood that the Electrical Installation of this vessel was fitted under the supervision of Messrs. P.F. Balfour and R. Rodger, who are no longer at this port.

(a) Main generator to switchboard cables are exposed only for approximately ^{30 cms.} above the generator, the remaining length to switchboard being completely in conduit.

(b) The fuses in the distribution boxes are, of the double pole type, and are constructed of porcelain, and well shielded according to Rule requirements, and are of German manufacture.

(c) The lighting of the engine room as now installed would apparently entail the blowing of 4 separate double pole fuses before the engine room space would be left in total darkness.
