

S.S. "KAIAN MARU".

This vessel was built under Special Survey by Messrs. Mitsubishi Zosen Kaisha, Ltd., in March of this year and the 1st entry report has now been received.

Owing to the scarcity of material

The scantlings of various parts of the structure differ from those as shown upon the approved plan and in many instances built up sections have been substituted for rolled sections.

A comparison has been made between the main scantlings as shown upon the 1st entry report and those as approved, and it is found that the former are equivalent to the requirements of the Rules, and could therefore be recommended for the favourable consideration of the Committee for the 100A class.
