

EEBOARD REPORT on the

## Oil Barge "MANUEL RIONDA"

It is submitted the Havana Surveyor be advised that it is noted that the lengths of the erections indicated on his foreboard report differ considerably from those reported by him ~~from~~ for the sister vessel "W.E. OGILVIE", and that the lengths given by him for both these vessels differ from the particulars originally reported when both these vessels were built. A sketch showing the length of the erections as reported when the vessels were built should be forwarded him, and he should be requested to verify the lengths on the actual ships in order that foreboards may be assigned for the "MANUEL RIONDA", and that those assigned for the "W.E. OGILVIE" may be modified if necessary.

Mr. Walt, please.
