

"VIRGEN DE LA LUZ"  
-----

The question of the limits of service of this vessel has been the subject of correspondence with the Owners through the Barcelona Surveyors, and a cable has now been received stating that the Owners desire that the service should cover North and North West Africa, the Canary Islands and from Cadiz to Marseilles.

The only addition required by the Owners to the notation of service previously arranged is to include the Canary Islands. These are situated in the perpetual summer zone, and relatively close to the North West African coast, and it is considered that no objection might be taken to the range of service now desired.

It is therefore submitted the class be assigned as follows -  
100A1 "Coasting Service North and North West Africa, including the Canary Islands, also from Cadiz to Marseilles.

Cablegram 3.7.45. Answd 4.7.45.

  
4th July, 1945.
