

COPY.

27th August, 1935.

VANCOUVER.

4006. "MOSHULU". This vessel has today been classed 100A-- , with notations of s.s. 2nd No.3-7,35, DBS 7,35 100lb., Date of Build 1904.

I have to point out that if the figure "1" for equipment is desired the equipment should be brought into conformity with the Rule requirements by the supply of an additional 30 fathoms of chain cable, and I shall be glad if you will let me know the Owners' intentions in regard to this matter.

In regard to the fees charged for the survey of the hull

I would point out that in similar cases, where the vessel which has been previously built, but has never been classed with this Society, comes under survey for classification, it has been customary to charge a fee of approximately 40% of the amount that would be charged for Special Survey during construction of a new vessel of the same tonnage.

On this basis therefore the fee chargeable would be, say £93, and it is therefore considered that a higher fee than £64 should have been charged.
