O.G.

Boiler Survey due 4.33.

The Owners state this vessel is laid up indefinitely. They state the boiler doors are all off and the oilers dried out and in first class order, and that they are taking every precaution to prevent any deterioration in the oilers. They therefore ask that the vessel be allowed to remain in class until the next Annual Survey, or if put in service before then the above survey will be held.

Submitted for approval provided the Boilers are Runaged before steam is again raised.
