REPAIRS, OR EXAMINATION AS PER RULE, FOR Vessel alleged to have stranded whilst leaving Puerto Eden on October 6th 1954 with a cargo of limestone for San Vicente

Vessel will proceed to Valparaiso for further examination and repairs

A complete survey was not possible as most affected parts are in way of tanks, and water surrounding vessel and pier was opaque with lime stone wash, not permitting a divers report

The following temporary repairs were carried out in San Vicente in addition to those already done in Puerto Eden, to permit vessel to proceed to Valparaiso there to enter drydock for further examination and repairs. These repairs were found necessary on examining the vessel in unloaded condition.

Now Done: #1 Hold (Starb. Bilges) Cement bilge boxes between frames 147/153 (Port Bilges) Cement bilge boxes between frames 143/147 to stop slight leakage. (Over)
