urveys due Special Survey due 10.55. Postponement until  
9.56. approved provided satisfactory General Examination  
in drydock held.  
Port Screwshaft due 3.56.  
Donkey Boiler Survey due 6.56.  
Subjects of class see Sng.11317.

roposed to be

emarks

In March the Owners stated that it was not  
possible to spare the time to carry out the General  
Examination in drydock. In reply they were informed that  
this inspection should be held afloat at that time,  
leaving the drydocking for two/three months.

The General Examination was commenced at Sng. in  
May.

It is now stated that the Managing Director and  
Consultant have been in Japan since the middle of July  
investigating docking facilities there and are expected  
to return in the middle of September.
