N A G A S A K I.

11th January, 1926.

Two Riveted Steel Plate Air Receivers, made by Messrs. Nagasaki

works, Mitsubishi Zosen Kaisha, Ltd., for the Motor Vessel
"SANTOS MARU", No. 410, and marked as below, have
been surveyed during construction by the undersigned.

The material has been tested by the Surveyors to Lloyd's
Register: the scantlings are in accordance with the Society's
Rules for a working pressure of 427 lbs. per square inch, and
the workmanship is good.

The Air Receivers having been tested in my presence on the
16th September, 1925, by hydraulic pressure to 640 lbs. per
sq. in. showed no signs of weakness, and were found tight and
sound in every respect at that pressure.

Working pressure not to exceed 427 lbs. per square inch.

No. 120.
LLOYD'S TEST.
640 lbs.
W.P. 427 lbs.
R.C. 16-9-25.
