Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

6th January, 1927.

Dear Sir,

I am in receipt of your letter of the 24th ultimo forwarding New Orleans freeboard report No.3052A and freeboard application form in respect of the Motor Vessel "KOSMOS I", but with regard thereto I have to state that it is observed the moulded depth is reported to be 18'-4", whereas the depth given on the First Entry Report is 18.01 ft., and I shall be glad if you will ascertain and let me know which figure is correct.

At the same time the sheers at $\frac{1}{8}$ th of the vessel's length from each end should be reported, also the draught approved as a condition of the class of the vessel.

It is observed that the length of the poop is measured over the stern, but I have to point out that the length from the after side of the sternpost should be reported.

I am, Dear Sir,

Yours faithfully,

James French, Esq.,

NEW YORK.
