

27 DEC 1944

Oil Barge "Y. 126".

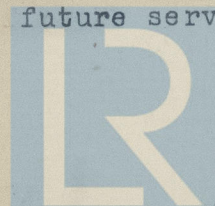

Brs. 15991.

This vessel holds the record ~~BLMC~~ 8.44 and S.7.44 and is classed for certain specified restricted services in American waters.

The vessel has recently made a voyage under her own power from the U.S.A. to Bristol without being covered by any certificate from the Society; and the present Owners, the United States Army Authorities, have asked for a survey by the Society's Surveyors to ascertain the vessel's condition on completion of the voyage.

The BRISTOL Surveyors now report having generally examined the machinery without any parts being opened up, an examination in dry dock and an examination of the generators under working conditions. They report all being found in good order except for some minor defects referred to by the Chief Engineer.

It is submitted action be deferred pending a decision as to the vessel's future service.
