

12th June, 1952

"C"

M.T.B. "KESTREL"

Dear Sirs,

I have to inform you that the First Entry Reports of the above vessel have now been received, and that the Ipswich Surveyors have advised this Office that the electrical installation is not yet complete, as the 3KW. 100 volt dynamo supplying current for the electric cooker remains to be fitted when available. It is also understood that the Owners intend to complete this electrical installation in your area, where the barge is now operating.

In the circumstances, I shall be glad to receive your Rpt.9 when this matter has been dealt with. The case has therefore been withheld from Committee, pending the receipt of the document in question.

Yours faithfully,

pro Clerk to the  
Classification Committee.

The Surveyors.  
HULL.
