Reference

Dear Sirs,

"KESTREL C"

Herewith reports 1, 46 and 13 covering Hull, Machinery and Electrical Installation of this tank barge built at Wivenhoe.

With reference to report 13, I would point out that electrical installation is not yet complete, as the 3 KW. 110 volt dynamo supplying current for the electric cooker remains to be fitted when available.

The electric cooker fitted in the crew space forward is not of an approved or flameproof type and the builders and Owners have been requested to obtain and fit an approved type cooker, before the 110 volt dynamo is fitted.

It is the Owners intention to complete the electrical installation in the Hull area where the barge is now operating, and the Surveyors at Hull have been kept fully advised of the position.

Yours faithfully,

The Surveyors.
LONDON.

The Secretary
London.
