High Close, Wiltshire Road,

Wokingham, Berks.

17th April, 1940.

H.

To the Surveyor at HANKOW

B

Vessel's Name, t.s.steamer "PAO WO"

QUESTION.

ANSWER.

With reference to your report No.232, I shall be glad to learn what arrangements are proposed to be made for the completion of the Boiler Survey, which became due so long ago as as July, 1939, by the adjustment of the safety valves under steam.

You will also be so good as to let me know whether any further developments have arisen in connection with the completion of the Special Survey No.2.

*LLP*

Date:— July 17th, 1940, Hankow.

No change has taken place in the situation at Hankow since my report No. 232 was issued. *Oct 1940*

The General Managers for the Indo-China S.N. Co., Ltd., request that the surveys be put off until there is some prospect of the vessel again being placed in commission. In this connection I would advise that there is still no indication that the river will be open to traffic in the near future.
