

DS 592

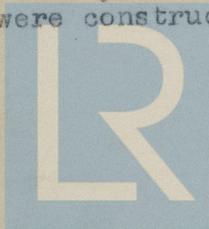

10th May, 1955.

NANTES.

480 "ISANDA. The contents of your report have been noted but assignment of class has been withheld pending satisfactory capacity tests being held on the type of safety valves fitted to the boilers of this ship.

It is concluded, but I shall be glad to receive your confirmation that the 150 KW diesel generator engine is fitted with crankcase explosion relief devices in accordance with the terms of Circular No. 2045.

As the Certificates in respect of the main circulating pumps, heaters, evaporators and other items do not appear to have been received in this Office, it is concluded that these were made under survey. Please furnish Certificates for all parts which were constructed under the Society's supervision.
