11th May 1925.

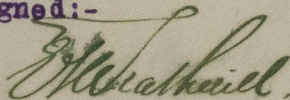

Vessel No.306 built by Irvine Co.

We beg to state that from the records at these works, we find the following sections were rolled and tested in accordance with the description given below:-

Channels:-  $12 \times 3\frac{1}{2}$   
Bulb Angles:-  $10 \times 3\frac{1}{2}$ ,  $9 \times 3\frac{1}{2}$ ,  $8 \times 3$  and  $6 \times 3\frac{1}{2}$ .  
Ordinary Angles:-  $4 \times 4$ ,  $4\frac{1}{2} \times 3$ ,  $3\frac{1}{2} \times 3\frac{1}{2}$ .

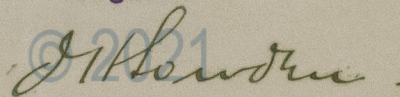

were supplied by Messrs.Cargo Fleet Iron Co. in 1907 from May to August inclusive, and were tested to Germanischer Lloyds requirements by Mr.Casley. The test limits being 27/32 tons, 20% elongation in 8". Bend tests were found satisfactory.
