St. Andrew's Dock,

HULL, Jany. 6th., 1906.

Messrs W.V.V. Lidgerwood,  
Coatbridge.

Dear Sirs,

Regarding the engines for the steam trawlers "OLIVINE",  
"TOURMALINE", "GOLDEN SCEPTRE", and 331 - 212. We are satisfied with  
one feed pump and one bilge pump. The bilge pump being a duplicate  
of the feed pump and connected so that it can be used as a feed pump  
in the event of anything happening to the feed pump. We have only  
one feed pump and one bilge pump in this same class of engine here,  
exactly the same size.

Yours truly,

(Signed) Elliott & Watson.
