Recommended S.S. Bol No. 45

# POSTPONED SURVEYS.

Case of the S.S. "MANUEL CALVO".

No. 17730. in Reg. Bk. tons, Built

Classed Owners

Port of Registry

Survey Due Load Line Certificate expires 30, 4, 50.  
Special Survey due 4,49.  
Fit of starboard L.P. crank pin in after web  
to be specially examined by 12, 49 (6 months' limit)

In view of a General Examination held in dry dock at Barcelona in June/July last the Committee agreed to the Special Survey being postponed until 12,49.

In October last the Bilbao Surveyors reported the vessel examined afloat on account of wasted shell plating and in view of this the Committee asked on the 25th ultimo for confirmation that arrangements were in hand to complete the Special Survey not later than the end of December as previously agreed.

The attached cablegram has now been received from the Bilbao Surveyors stating that the Owners have requested permission to postpone the Special Survey for two further voyages or approximately 5 months. In view of the Classing Letter dated the 25th ultimo the Surveyors desire to know if further postponement is possible and if so under what conditions. The vessel is expected to arrive at Cadiz or Santander in a few days' time.

*Submitted for the Consideration of the Committee*

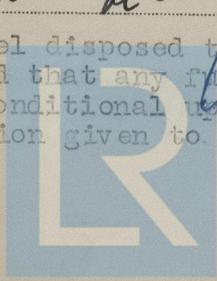

Committee's Minute FRI. 30 DEC 1949

*Booth*  
*L.J.*  
23.12.49

Decision Defered

*must now be class*

Should the Committee feel disposed to deal sympathetically with the proposal, it is suggested that any further postponement of the Special Survey should be conditional upon a thorough General Examination and particular attention given to the shell plating.
