

S.S. "EL BUARO".

A representative from the Office of Messrs. C. T. Bowering & Co. called this evening and requested to be informed whether the certificates for the steamer "EL BUARO" recently built by Messrs. Thornycrofts at Southampton could be issued as it is necessary that these should be presented to the Representative of the Government of Ecuador.

As the reports had not been received at this Office, they stated that they would communicate with their representative at Southampton requesting him to get in touch with the Society's Surveyors with a view to the reports being forwarded at the earliest possible moment,

It was pointed out that the survey fees required to be paid, and also that the builders' consent would be necessary before the certificates were handed over.

16th May, 1927.
