re: Steamer "PETRA"

You will know that we have purchased the Swedish steamer "PETRA" from
 Danish Owners Tre Kronor in Gothenburg/Sweden, and which vessel was classed
 for Society. We intend to convert this ship to a motor vessel.

One item remaining on board is the Donkey Boiler, built by Cochran & Co.,
 Glasgow/Scotland, No. 4117, built in 1906, max. pressure 100 lbs.. We are
 desirous to obtain technical details or boiler certificates either from the ship or
 the Owners.

Please advise us who can supply duplicate boiler certificates.

As learnt from Mützelfeldwerft in Cuxhaven that extensive work has been
 carried out under your survey, such as tank testing etc. on the occasion of
 the last repairs. We shall be glad if you will let us have the respective
 certificates.

Thank you in advance for your efforts and remain,
