

Copy for LONDON.

24th March, 1948.

Sir,

"THERAPUS" Swansea Report No. 24091.

"OILFIRE" Swansea Report No. 24092.

With reference to your Classing Letter of the 23rd instant relating the above vessels, we beg to confirm that the berdams and oil fuel wing tanks in machinery space remain to be tested. The feed water double bottom tanks in machinery space were examined internally and tested and included in our report therefore it is assumed the tank referred to is the P.W. under the upper deck starboard side which has not been examined and should also be included with the items to complete.

We are, Dear Sir,
Yours faithfully,
The Surveyors,
Per:-

Secretary,
DN.
