Reference

The Secretaty,

London.

Dear Sir,

S.S. "KOSHIN MARU"

Kobe Report No.4606.

In reply to your classing letter dated 14th. November 1924 regarding the above vessel I regret the omission of the following particulars from the report.

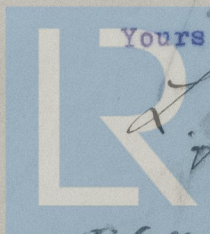

(1) The rivets in the treble riveted butts of the shell plating are spaced 3½" diameters instead of 3½ inches as reported.

(2) The sheerstrake is doubled at the ends of the bridge with .72" plate at fore end and .70" plate at after end.

(3) The steel used in the construction of the vessel has been made by the "Open Hearth" process.

I am, dear Sir,

Yours faithfully,

Lloyd's Register
