

Enclosure.

12th August, 1949.

Dear Sirs,

s.s. "GEORGIJ SEDOW" - Reclassification.

I return herewith two copies of the plan of steam piping arrangement, sent with your letter of the 24th June, and have to acquaint you that the same will be approved provided the drainage arrangements be to your satisfaction, the new pipes, valves and fittings be made and tested as required by the Rules and the work be carried out under the usual conditions of survey and testing.

Your further letter of the 6th July has also been received from which I note it is proposed to instal in this ship in place of the existing auxiliary boiler, a boiler which was constructed by Messrs. Verschure & Co., Amsterdam, in 1940, under the supervision of the Society's Surveyors.

The Plan (No. 2825B) forwarded by you, and three copies of which are now returned, is similar to the original plan approved for a working pressure of 15.45 kg/sq.cm., (220 lb/sq.inch), in April 1939.

In the circumstances, this boiler could be accepted provided the same be examined and found in good order, the scantlings be as shown on the plan, and the boiler be installed on board the ship in accordance with the Rules and examined under steam and found satisfactory.

I should point out, however, that as the two existing main boilers and the dimensions of the crank and straight shafting in this ship were approved in my letters of the 4th and 11th May last for a working pressure of 14 kg/sq.cm (200 lb/sq.inch), and in view of the fact that this replace auxiliary boiler is connected to the main boilers, the working

-2-

12th August, 1949.

pressure of the auxiliary boiler should not exceed that of the main boilers, and the safety valves of the auxiliary boiler should accordingly be adjusted to 14 kg/sq.cm.

I may add that a First Entry Report relating to this replace auxiliary boiler is not available in this Office, but I am communicating with the Amsterdam Surveyors with a view to obtaining this report which will be transmitted to you when it is received.

Yours faithfully,

Ad

pro Secretary.

The Surveyors,

ANTWERP.
