Surveyed Afloat or in Drydock Drydock

Name of Dock

Naval Arsenal Puerto BelgranoDate of last examn. in Drydock 9-6-59.

N.B.—Any alterations in existing particulars in the Register Book should be reported and underlined.

Last Report: No. 30735Port B.A.

To be filled in at Head Office.

Particulars of Classification (which must be inserted precisely as in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be separated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eg) which is to be attached to this Report.

Give dates and references to any letters relating to this Report

In damage cases where the Surveyor has not made a special damage report he should state whether he offered

his services for this purpose and to whom and why they were declined

Was a damage report made by anyone else? If so, by whom?

EXAMINATION AND REPAIRS AS PER RULE FOR DOCKING AND SPECIAL SURVEY

HULL DEFECTS: Fractures found in shell plate strake E, port side, in way of pump room (Pump room amidships). Fracture (1) completely across plate, 6" aft of pump room, forward bulkhead, and fracture (2) approximately 3" long, 6" forward of pump room after bulkhead. Both these fractures in way of termination of each end of longitudinal in pump room.

NOW DONE (1) Plate cropped for three feet either side of fracture and insert fitted.

(2) Vee'd out and welded, and doubler fitted as below.

Doubler plates 12" square fitted at each end of longitudinal, between longitudinal and shell and welded in place.

Fracture in No. 4 starboard wing tank, bilge strake, vee'd out and welded and doubler plate fitted inside tank over repair, which coincided with after end of longitudinal.

All tanks now examined internally and tested.

Lower half of rudder replated, all pintles overhauled and bushing renewed approximately 1500 rivets renewed at fore end of hull.

After peaks—Washplate cropped and part renewed and sounding pipe renewed.

S.R.L. Pitting in rudder & sternframe & shell plates E.F. & G strakes P. & S, built up with welding & as noted above, bottom half of rudder replated. The pitting in the sternframe still appears active and was dealt with at this time, and it is submitted that the subject of class

Fair'd or Repaired in place								

Has a Survey also been held on machinery of the Ship?

Yes

If so, is the Report sent now, or when will it be sent?

Now.

Is Classification Certificate required? If so, to be sent to YES THIS OFFICE

Has Interim Certificate been issued?

Yes

GENERAL OBSERVATIONS, OPINION AND RECOMMENDATION AS TO CLASS

State clearly what alteration, if any, is suggested to be made in the existing Classification or Survey or other records of the Ship in the Register Book consequent upon this survey, for example:—"to remain as Classed in the Register Book without fresh record of Docking"; "to remain as Classed and to have record of drydocking 1,55"; or "to remain as Classed and to have record of drydocking 1,55 and the notation of S.S. ... 1,55".

This vessel, so far as now seen, is eligible in my opinion to remain as now classed with fresh record of D.S. 6,59 and notation S.S. Buenos Aires 6,59.

James S. Cook
Surveyor to Lloyd's Register of Shipping
J.S. Cook.
